The Business Owner's **Accounting Nightmare**

Running a business is already tough. Managing finances shouldn't make it harder.

High Fixed Costs

In-house accountants cost ₹25k-40k/month plus benefits, draining early-stage capital.

Staff Turnover

Frequent resignations leave you stranded, forcing you to restart training repeatedly.

GST Stress

Last-minute filings, portal glitches, and the constant fear of penalties and notices.

Financial Reporting Stress

Scrambling to create financial reports overnight when banks or investors ask for data.

Cash Flow Uncertainty

Flying blind without knowing your true cash position or where money is leaking every month.

Compliance Overwhelm

TDS, PT, PF, ESIC – the alphabet soup of statutory compliances that distract you from growth.

What In-House Account Costs You **Beyond Money**

The hidden price tag of inefficient accounting is often higher than the visible expense.

Time Cost

200+

HOURS / YEAR WASTED

Business owners spend ~4 hours weekly on manual work instead of growing the business.

Money Cost

MISSED

OPPORTUNITIES

Without clear reports, you lose out on profitable deals and smart investment choices.

Risk Cost

FINES

& PENALTIES

Late GST filings and errors lead to avoidable fines and government notices.

Mental Cost

OWNER

STRESS

Constant worry about tax deadlines stops you from focusing on your business growth.
